VOLVO S60 PRICING

THE VOLVO S60

If you've been searching for a stylish, sporty machine then look no further – the Volvo S60 is the definitive sports saloon. Blessed with perfectly sculpted body work and a luxurious interior, it certainly looks the part. But it's under the bonnet where it really excels – take a look through this price list to find out about the S60's jaw dropping performance.

T5

The T5 2.4 litre, turbocharged, in-line, 5 cylinder engine delivers outstanding performance – producing 260 PS and 350 Nm torque. This extremely smooth engine features variable valve timing on the exhaust side and a responsive turbocharger designed to deliver maximum torque from low and medium engine speeds. Effortless performance is combined with excellent fuel consumption and CO₂ emissions.

D5

The D5 2.4 litre, turbocharged, in-line, 5 cylinder, common rail diesel engine delivers very low fuel consumption and CO₂ emissions with excellent performance – producing 185 PS and 400 Nm torque. This extremely advanced diesel engine is made entirely of aluminium giving it a similar weight to a petrol engine. This advanced design combined with third-generation electronic common rail fuel injection, variable blade turbocharger and a diesel particulate filter makes it one of the cleanest and most advanced diesel engines available on the market. A 2.4D version with 163 PS is also available.

BI-FUEL

As part of Volvo's total commitment to the environment, the S60 Bi-Fuel engine enables you to benefit from the lower cost of CNG⁽ⁱⁱⁱ⁾ and reduce harmful emissions to the atmosphere.

- Compressed Natural Gas.
- These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model. Additionally driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.
- The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.
- For best performance and lowest fuel consumption 98 RON is recommended. 95 RON can be used for normal driving.
- (v) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 750 kg.
- (vi) Figure quoted without sunroof.

Notes

The weight of the vehicle will influence the level of CO2 emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO2. Once a vehicle has been built it will be given its own specific CO₂ emission on which the Vehicle Excise Duty will be charged.

A weighbridge must be used to determine specific weights.

Data valid for manual transmission unless specified.

All measurements in mm.

The Max. output figures are quoted in PS (Pferdestärke), which is the metric equivalent of brake horsepower.
