

THE NEW VOLVO C30 PRICING

THE NEW VOLVO C30

Introducing the outstanding new Volvo C30 SportsCoupe. This dynamic, two-door, four-seater delivers exterior style with a dramatic and expressive design whilst the interior features the celebrated and unique Volvo floating centre stack. Coupled with a wide range of engines from fuel-efficient diesels to performance-orientated turbo-charged petrol engines, the new Volvo C30 dares to be different.

Starting with a decorative aluminium inlay and dark sports floor mats with contrasting piping, the interior is an aesthetic adrenaline kick. A unique leather steering wheel, sports pedals, and gear knob with aluminium inserts feel great to the touch. Unique upholstery with embossed logo is in off black T-Tec with contrasting cream leather. Blue instrument dials complete the interior detail. The attractive exterior styling includes a sports bodykit, rear spoiler, alloy wheels, front grille with logo and side mirror caps in a silver matt finish.

FLEXIFUEL

Choosing a Volvo C30 Flexifuel can help reduce fossil carbon dioxide emissions without having to compromise on either performance or comfort. Running on E85 bio-ethanol or regular petrol, a Volvo Flexifuel offers total flexibility.

- (i) For best performance and lowest fuel consumption 98 RON is recommended. 95 RON can be used for normal driving.
- (ii) These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model. Additionally driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.
- (iii) Figure quoted without sunroof.
- (iv) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 700 kg.

Notes
The weight of a vehicle will influence the level of CO₂ emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO₂. Once a vehicle has been built it will be given its own specific CO₂ emission on which the Vehicle Excise Duty will be charged. A weighbridge must be used to determine specific weights. Data valid for manual transmission unless specified. All measurements in mm.
Gt = Geartronic Automatic Transmission
The Max. output figures are quoted in PS (Pferdestärke), which is the metric equivalent of brake horsepower.
