

VOLVO V50 PRICING

THE VOLVO V50

The Volvo V50 Sportswagon has been designed with a zest for life and an eye for detail. The V-shaped bonnet, full-length pronounced shoulders and distinctive rear styling ensure instant recognition as a Volvo, and the innovative lines indicated by the outside continue inside.

The radical design of the floating centre stack conjures images of contemporary high-end technology. A world first, controls for the sophisticated audio system and electronic climate control are co-located in the style of a high-tech remote-control unit to create a feeling of unassuming simplicity.

V50 S

The comprehensive specification includes ECC (Electronic Climate Control), 16" Cygnus alloy wheels, DSTC (Dynamic Stability and Traction Control), power windows, cruise control, leather steering wheel, a 6-speaker radio/CD system and roof rails.

V50 SPORT

The striking exterior lines are enhanced with 18" Medusa alloy wheels and full bodykit whilst the unique interior design is complemented with the addition of new Dala upholstery.

V50 SE

The SE model brings added luxury to the Volvo V50 Sportswagon. Leather upholstery, 17" Zaurak alloy wheels, rain sensor, a choice of interior inlays and power driver's seat are just some of the standard SE features.

V50 SE SPORT

The SE Sport model is the ultimate choice within the range, combining the extensive interior luxury features of the SE with the dramatic exterior bodykit and 18" alloy wheels from the Sport model.

- (i) The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.
- (ii) These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model. Additionally driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.
- (iii) Figure quoted without sunroof.
- (iv) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 700 kg.

Notes

The weight of a vehicle will influence the level of CO₂ emitted. As a result, vehicles with higher levels of specification and factory fit options may emit higher levels of CO₂. Once a vehicle has been built it will be given its own specific CO₂ emission on which the Vehicle Excise Duty will be charged. A weighbridge must be used to determine specific weights. Data valid for manual transmission unless specified. All measurements in mm.

The max. output figures are quoted in PS (Pferdestärke), which is the metric equivalent of brake horsepower.
