(i) The Urban fuel consumption figure is based on typical city driving, including starting the car from cold. The Extra Urban figure is based on typical motorway driving and cruising. The Combined figure averages the consumption across both cycles.

(ii) These results do not express or imply any guarantee of the fuel consumption of a particular car as there are inevitable differences between individual cars of the same model.

Additionally driving style, traffic conditions, as well as the age and mileage and standard of maintenance will affect a car's fuel consumption.

(iii) Figure quoted without sunroof.

(iv) Unbraked towing weight must not exceed 50% of kerb weight up to a maximum of 700 kg.

Notes

Some specifications may have lower CO₂ emissions than those shown. Once a vehicle has been built it will be given its own specific CO₂ emission figure on which Vehicle Excise Duty and company car tax, where appropriate, will be calculated. Please contact your dealer for details.

A weighbridge must be used to determine specific weights. Data valid for manual transmission unless specified.

All measurements in mm.
