Tool for removing  
camshaft gear  
(late production)

# Service Bulletin.

Tool no	Description	Used for
SVO 2250	Puller for camshaft gear (late prod)	B4B, B14A and B16 engines

## Instructions for use

- 1 Remove the pulley and timing gear cover (see Service Manual, PV 444-445, Part 1).
- 2 Knock down the tab washer on the camshaft nut and remove the nut.
- 3 Apply the tool by inserting the legs through the holes in the camshaft gear and then turn the plate in a clockwise direction. Remove the gear.
