SHOCK ABSORBERS

Re: selection of shock absorbers.

On those of our vehicles which are equipped with shock absorbers we have, after thorough tests, selected shock absorbers with damping properties suitable for the general design of the vehicle. The use of unsuitable shock absorbers subjects the chassis to uncontrolled forces with resulting damaging effects.

We would therefore emphatically warn against using non-original shock absorbers and particularly adjustable ones. If non-original shock absorbers are fitted, our guarantee for the vehicle becomes null and void in all respects.
