SPARK PLUGS

B 16 B engine

Spark plugs for hard driving

When this engine is subjected to particularly hard driving, spark plugs of a colder heat range should be used instead of standard plugs.

Suitable spark plugs for hard driving are:

Bosch W 240 T3

Champion J 6 (late production)

AC C 43

or corresponding types

Late production Champion J 6 plugs, which also include the earlier grade J 5, can be recognized by the fact that the electrodes are a little thicker.
