Service Bulletin.

Spacing sleeve in rear spring shackle

In order to obtain more even tightening of the nuts in the rear spring shackle on PV 445 we have introduced a spacing sleeve on the tensioning bolt between both the spring shackles. The sleeve has been introduced in production as follows

P 4450	with effect from chassis no.	27865
P 4451	ditto	3346

These spacing sleeves can also be fitted on vehicles with lower chassis numbers. They can be obtained from our Spare Parts Department under part no. 659765 and the number required is 2 per vehicle.
