Protector plates for engine compartment

In order to prevent the engine compartment on 121/122S cars from becoming dirty, three protector plates are being fitted as follows:

1. In connection with the introduction of a new bonnet (hood) lock, the upper member is in the form of a protector plate fitted with a rubber packing, see Fig. 1.

Member	658467
Rubber packing	657986

2. Under the front members beside the underside of the engine, two protector plates have been fitted as shown in Fig. 2. These plates are attached with plating screws.

Protector plate, left	660014
Protector plate, right	660015

3. The opening between the front member - wheel housing plate - bulkhead has been covered by a plate on each side. These plates are spot-welded close to the bodywork, see Fig. 3.

Attaching plate, left	659008
Attaching plate, right	659009

Volvo will not make any compensation concerning the fitting of these plates on earlier model cars.
