DOOR LOCKS

PV 544, PV 445

Service Bulletin.

Only for Volvo Dealers Service Bulletin file.Re: Right door lock

During a transition period on the PV 544 and the PV 445 it has been possible to lock the right-hand door from outside the car by moving the inner handle to the lock position and then closing the door.

We have now returned to the earlier construction ,i.e. the door can only be locked from inside the car.

Both these designs are completely interchangeable. The part numbers are as follows:

	Lock, can be operated from outside the car	Lock , can be operated from inside the car.
PV 444,PV 544	660962	92787
PV 445	661051	96172
